

Philippe Colliat
Manager, Software Development

Professional Profile

Mr. Philippe Colliat is a Manager in Exponent's Technology Development practice. He has 14 years of software design and development experience, including: C#/.Net, WPF/XAML, Java, XML, XSLT, C/C++, web services, database, and user interface design for rich- and web-based client applications. He specializes in object-oriented software architecture design for both server software and client applications, with experience ranging from personal digital assistants to desktop computers to back-end servers. Mr. Colliat has extensive experience working as a lead software developer and architect working in teams of software developers.

Since arriving at Exponent, Mr. Colliat has worked on numerous projects involving video, robot and unmanned aerial vehicle control, geospatial visualization, low-level device interfacing and control, and mobile and satellite communications. Prior to joining Exponent, he has worked on business-to-business collaborative software utilizing standard messaging protocols, business processes, and Internet protocols; and Interactive Voice Response systems and corresponding development tools.

Prior to joining Exponent, Mr. Colliat worked in Software Engineering for Cyclone Commerce, Syntellect, Sedona Systems, TekNow, Honeywell, and Bull HN.
