

Exponent[®]
Engineering & Scientific Consulting

Michael Levine, Ph.D.

Senior Scientist | Data Sciences

Natick

+1-508-652-8550 | mlevine@exponent.com

Professional Profile

Dr. Michael A. Levine is an Imaging Scientist with over 9 years of experience, specializing in clinical applications. Integrating the fields of Healthcare, Mathematics, and Software Development, Dr. Levine works to craft and deliver analytical solutions to human-centered problems.

Prior to joining Exponent, Dr. Levine was a Research Fellow at Harvard University and Massachusetts General Hospital in the Athinoula A. Martinos Center for Biomedical Imaging, where he developed tools to process and analyze data from simultaneous Positron Emission Tomography and Magnetic Resonance Imaging systems. His research focused on the use of mathematical modeling to track neurotransmitter release in the human brain. He used both acquired data and simulations to quantify sources of measurement bias and reduced them using novel compartmental modeling approaches. He also developed methods for unifying PET- and MR-based estimates of head motion, crafted large multifaceted pipelines for image data analysis, and implemented specialized methods for PET image reconstruction and transmission mode acquisition. Dr. Levine has software development experience working with MATLAB, Python, R, Bash, and Git.

Prior to his graduate work, Dr. Levine held a Research Assistantship at Massachusetts General Hospital where he analyzed dynamic contrast MRI in support of clinical trials in neuro-oncology. He also held an Internship in Biomedical Engineering at Children's Hospital Boston where he gained hands-on experience determining the failure mechanisms of a variety of clinical devices.

Dr. Levine received his Ph.D. in Biophysics from Harvard University in 2020 and his B.S. in Bioengineering from Clemson University in 2012.

Academic Credentials & Professional Honors

Ph.D., Biophysics, Harvard University, 2020

B.S., Bioengineering, Clemson University, 2012

Prior Experience

Postdoctoral Research Fellow, Massachusetts General Hospital 2020-2022

Predoctoral Research Fellow, Harvard University, 2013-2020

Research Assistant, Massachusetts General Hospital 2010-2013

Biomechanical Equipment Technician, Children's Hospital Boston, 2010

Publications
