

Ellen Donovan, MPH

Vice President, Business Development | Business Development
Menlo Park
+1-650-688-6940 | edonovan@exponent.com

Professional Profile

Ms. Ellen Donovan has over 15 years of scientific consulting experience in the areas of health sciences, risk assessment, and environmental health. Ms. Donovan leverages her technical training and consulting experience to develop and implement corporate initiatives to drive business development and growth, with a focus on client service excellence. She has experience in marketing, communication, and works with Exponent's senior management, practice leaders and individual consultants to ensure that clients are connected to the right resources to solve their technical challenges.

In addition to her environmental health training, Ms. Donovan has over five years of experience in biomedical research and molecular biology. She has assessed data involving health outcomes due to environmental exposures, as well as historical data collected from industrial hygiene programs and occupational medical surveillance programs. She has experience characterizing the risks associated with exposure to a variety of chemicals as well as investigated the health risks associated with pathogen exposures in environmental and occupational settings.
