Engineering & Scientific Consulting

Kevin Ong, Ph.D., P.E.

Principal Engineer | Biomedical Engineering and Sciences
Philadelphia

Professional Profile

Dr. Ong's expertise is product design evaluation, material selection, and failure analysis of medical devices, surgical instruments, and medical equipment, with a focus on how patient, surgical/clinical, and device/design factors influence clinical performance, including device-tissue interactions. He has experience with orthopaedic, spine, fracture fixation, cardiovascular, and tissue reconstruction/tissue repair medical devices from product liability, intellectual property, regulatory/FDA compliance, product development, epidemiology, health economics, and technology assessment perspectives. His experience with medical equipment and surgical instruments includes catheters, fluid circulating/management devices, and devices for tissue removal or anchoring/attaching purposes.

He has directed preclinical and postmarket testing of bone/tissue to characterize biomaterials and medical devices, including wear testing and retrieval/explant analysis. He is also actively involved in health economics and outcomes research. Dr. Ong has been involved in biomechanics and biomedical engineering research since 1997.

Dr. Ong also has expertise in nonlinear finite element analysis, solid mechanics, and orthopaedic biomechanics. He has designed experiments for standard tests (e.g., ASTM, ISO), as well as developed non-standard or novel testing protocols. He has also evaluated the interaction between medical devices and injury tolerances/patterns. Dr. Ong is active in clinical outcomes and health services research, specifically using real world data (national healthcare databases and hospital records) to develop real world evidence for examining utilization, outcomes, risk factors, economic burden, cost effectiveness, comparative effectiveness, and health care technology assessment.

Dr. Ong is a registered professional engineer. Prior to joining Exponent, Dr. Ong was a research assistant in the Department of Mechanical and Aerospace Engineering at Cornell University, in the Cornell University-Hospital for Special Surgery Program in Biomedical Mechanics.

Academic Credentials & Professional Honors

Ph.D., Mechanical Engineering, Cornell University, 2004

B.S., Mechanical Engineering, Cornell University, 1998

Best Paper for the Section on Rehabilitation, Interventional & Medical Spine at NASS 33rd Annual Meeting, Awarded by the North American Spine Society, 2018

Best Poster for Primary Hip Award at AAHKS 27th Annual Meeting, Awarded by the American Association of Hip and Knee Surgeons, 2017

Best Basic Science Abstract Award at IUGA 41st Annual Meeting, Awarded by the International Urogynecological Association, 2016

Best Poster for Infection Award at AAHKS 25th Annual Meeting, Awarded by the American Association of Hip and Knee Surgeons, 2015

Lawrence D. Dorr, MD Award for the most outstanding paper in surgical techniques and technologies at AAHKS 19th Annual Meeting, Awarded by the American Association of Hip and Knee Surgeons, 2009

2nd Prize research paper at the British Orthopaedic Association Annual Congress 2008, Awarded by the British Orthopaedic Research Society and the British Orthopaedic Trainees Association, 2008

Lawrence D. Dorr, MD Award for the most outstanding paper in surgical techniques and technologies at AAHKS 18th Annual Meeting, Awarded by the American Association of Hip and Knee Surgeons, 2008

Best Poster Award at AAHKS 17th Annual Meeting, Awarded by the American Association of Hip and Knee Surgeons, 2007

Cornell University Mechanical & Aerospace Engineering Outstanding Teaching Assistant Award, 2002

Olin Fellowship, Cornell University, 1998-2001

Merrill Presidential Scholar, Cornell University, 1998
