

Exponent® Engineering & Scientific Consulting

Nate Levine, Ph.D., P.E., S.E.

Managing Engineer | Civil and Structural Engineering Menlo Park +1-650-688-6953 | nlevine@exponent.com

Professional Profile

Dr. Levine specializes in the design, analysis, evaluation, repair, and retrofit of buildings. He has extensive experience in structural health monitoring (SHM), having developed methods to use computer graphics and computer vision for post-disaster infrastructure assessment.

Dr. Levine has worked on a variety of building types, including laboratories, hospitals, K-12 education, and industrial facilities, and with a variety of materials, including steel, concrete, masonry, and wood. Dr. Levine has developed complex details for repairs and seismic retrofits to existing structures with minimal disruption. As part of a national infrastructure monitoring and management effort, he developed methods for monitoring inland waterway navigation structures, such as locks and dams. Dr. Levine's experience in SHM extends to various technologies, including vibration-based SHM and drones for visual monitoring and post-disaster condition assessment. He also has experience conducting large-scale structural testing.

Dr. Levine's Ph.D. research focused on the use of drones for rapid post-earthquake performance assessment of buildings. By connecting a photographic drone survey with a building information model, he developed a method to link automatically identified structural damage with a performance-based earthquake assessment. This work enables rapid, automated assessment of earthquake damaged buildings. To develop and prototype this method, Dr. Levine created a 3D virtual computer graphics environment where drone surveys and images of earthquake-damaged buildings could be simulated photorealistically. This virtual environment enables research on novel methods for computer vision-based post-disaster response where existing data may be unavailable.

Academic Credentials & Professional Honors

- Ph.D., Civil Engineering, University of Illinois, Urbana-Champaign, 2022
- M.S., Civil and Environmental Engineering, Stanford University, 2011
- B.S., Geological and Environmental Sciences, Stanford University, 2010

Licenses and Certifications

Professional Engineer Structural, Alaska, #216243

Professional Engineer Civil, California, #81451

Professional Engineer Structural, California, #6436

Professional Engineer, New Mexico, #29700

Academic Appointments

Research Assistant, University of Illinois at Urbana-Champaign, 2017-2022

Prior Experience

Project Engineer, KPW Structural Engineers, 2014-2017

Structural Design Engineer, Rutherford + Chekene, 2011-2014

Professional Affiliations

American Society of Civil Engineers (ASCE)

Structural Engineers Association of Northern California (SEAONC)
