

Exponent[®]
Engineering & Scientific Consulting

Phil Brooke, Ph.D., P.E.

Managing Engineer | Metallurgical and Corrosion Engineering
Atlanta
+1-678-412-4829 | pbrooke@exponent.com

Professional Profile

Dr. Brooke specializes in failure analysis, materials science, engineering mechanics, thin film coatings, system design, and the creation of testing apparatus. His degrees in mechanical engineering and materials science and engineering give him a broad experience base. With over 8 years of experience in failure analysis and consulting, he has assisted clients with issues related to food processing and storage, consumer electronics, medical devices including diagnostic, peripheral, and implanted devices. He has extensive knowledge of mechanical systems especially with a focus on materials including failure analysis of bearings, gears, and mechanical systems. He has worked in multidisciplinary teams for projects ranging from thin film coatings, high temperature reactions, batteries, MEMS, and optical structures, to fuel cell testing stations, building construction, and thermal regulation.

Prior to joining Exponent, Dr. Brooke was a graduate research assistant at the Georgia Institute of Technology, where he studied the deposition of functional thin film oxides on to complex 3D structures (including butterflies, inverse opals, and pollen) to create multifunctional assemblies for applications including active-passive displays and anti-counterfeiting. To facilitate this research, Dr. Brooke created multiple automated coating systems to deposit thin film coatings and also developed a novel high temperature (1000 °C) reaction process to remove sulphur contamination from barium titanate samples. Dr. Brooke also conducted research on the use of thin film coatings in lithium ion battery cathodes as well as mechanical testing for structural materials used on the James Webb Space Telescope.

Academic Credentials & Professional Honors

Ph.D., Materials Science and Engineering, Georgia Institute of Technology, 2015

M.S., Materials Science and Engineering, Georgia Institute of Technology, 2015

B.S., Mechanical Engineering, University of North Florida, 2010

Licenses and Certifications

Professional Engineer Mechanical, California, #38815

Professional Engineer, Georgia, #PE045615

Professional Affiliations

ASM

ASME
