Exponent®
Engineering & Scientific Consulting

# Sara Moshage, Ph.D.

Senior Associate | Biomedical Engineering and Sciences
Philadelphia
+1-215-594-8865 | smoshage@exponent.com

## Professional Profile

Dr. Moshage specializes in the characterization of tissue biomechanics through a combination of imaging, experimental, and computational techniques. Her formal training in bioengineering and mechanical engineering includes quantitative image analysis, using clinical computed tomography (CT) and microCT, mechanical testing, motion capture of large animals, and creation of subject-specific finite element models from imaging data.

Dr. Moshage assesses medical device performance and regulatory compliance using ASTM and ISO standards and custom test setups. She performs MRI compatibility assessments of medical devices using computational and experimental methods. Additionally, she leads medical device wear testing evaluations for multiple total joint replacement types, including cervical and lumbar discs, as well as hips. Dr. Moshage also analyzes bone-implant interface strength using electromechanical and servohydraulic mechanical test systems.

Prior to joining Exponent, Dr. Moshage received her Ph.D. training in Mechanical Engineering from the University of Illinois Urbana-Champaign. While there, she studied the adaptation of juvenile equine bone in response to early age exercise interventions, with the goal of reducing fractures in adult racehorses. She developed the first empirical relationship between clinical CT density and compressive modulus for juvenile equine bone, which she then applied to determine subject-specific adaptations to exercise in a group of young horses. Additionally, she quantified the relationship between microstructure and mechanical properties in juvenile equine trabecular bone. This work required extensive machining of bone tissue samples, design of mechanical test fixtures, scanning in both clinical CT and microCT, and coding in MATLAB to automate all processing steps for image analysis and mechanical test data.

## Academic Credentials & Professional Honors

Ph.D., Mechanical Engineering, University of Illinois at Urbana-Champaign, 2023

M.S., Mechanical Engineering, University of Illinois at Urbana-Champaign, 2019

B.S., Bioengineering, University of Illinois at Urbana-Champaign, 2014

PhD-level Student Paper Competition Winner, ASME-BED/SB3C, 2022

Graduate Fellow, Beckman Institute for Advanced Science and Technology, 2020

 

## Academic Appointments

Graduate Research Assistant, Tissue Biomechanics Lab, University of Illinois Urbana-Champaign, 2017 – 2023

Graduate Teaching Assistant, Department of Mechanical Science and Engineering, University of Illinois Urbana-Champaign, 2017 – 2018

## Prior Experience

Graduate Research Assistant, Tissue Biomechanics Lab, University of Illinois Urbana-Champaign, 2017 – 2023

Graduate Teaching Assistant, Department of Mechanical Science and Engineering, University of Illinois Urbana-Champaign, 2017 – 2018

Peace Corps Volunteer, Mozambique, September 2014 – November 2016

## Professional Affiliations

American Society of Biomechanics (member)

Equine Science Society (member)

Order of the Engineer

## Patents

US Patent 11,798,434: Three-Dimensional Knee Model with Realistic Physiological and Biomechanical Knee Function, October 2023 (Kersh ME, Goldsmith SW, Moshage SG, Pineda Guzman RA).

## Publications

Moshage SG, McCoy AM, Kersh ME. Elastic modulus and its relation to apparent mineral density in juvenile equine bones of the lower limb. Journal of Biomechanical Engineering 2023, 145(8):1-13. Selected as Editors' Choice Paper.
