

Exponent®
Engineering & Scientific Consulting

Tiffani Fordyce, Ph.D., M.P.H.

Principal Scientist | Health Sciences
Menlo Park
+1-415-613-9691 | tfordyce@exponent.com

Professional Profile

Dr. Fordyce brings over 23 years of expertise in epidemiologic research, specializing in cohort and case-control study designs. She has extensive experience developing and managing research protocols, study execution, statistical analyses, and data collection and management essential to epidemiologic investigations. Her work for national defense, energy, and other industry sectors helps ensure worker protection of our nation's most critical workforce.

For over a decade, Dr. Fordyce's work has included leading large-scale, industry-wide occupational injury surveillance programs to monitor injury incidence and outcomes. Additionally, since 2007, she has managed multiple cohort mortality studies, applying rigorous epidemiologic methods to assess long-term health outcomes related to occupational exposures. Currently, as Principal Investigator for an award funded by the Department of Defense's Congressionally Directed Medical Research Program, she is conducting a cohort mortality study alongside development of a job exposure matrix, integrating exposure assessment with epidemiologic analysis.

Dr. Fordyce's epidemiologic experience also encompasses comprehensive evaluation of exposure data and disease outcomes to elucidate the relationships between air pollution, specifically PM2.5 exposure, and adverse health outcomes.

Dr. Fordyce's epidemiologic expertise extends to conducting systematic reviews and critical evaluations of healthcare utilization, disease treatment patterns, and adverse health events. Her research also encompasses traffic safety epidemiology, including studies on vehicle field performance, safety device effectiveness, and behavioral risk factors. Her occupational epidemiology research has focused on risk factors and disease outcomes related to lung cancer, mesothelioma, and various non-malignant diseases. Dr. Fordyce has also contributed to the synthesis and interpretation of asbestos-related scientific literature, supporting expert testimony and litigation contexts.

Prior to joining Exponent, Dr. Fordyce served as a Social Science Research Assistant II at the University of Michigan Transportation Research Institute in the Social and Behavioral Analysis division. While at Exponent, Dr. Fordyce continues to advance the state-of-knowledge related to occupational exposure and potential adverse health outcomes, through her contribution to peer-reviewed literature and continued research grant funding.

Academic Credentials & Professional Honors

M.S., Clinical Research Administration, Walden University, 2016

Ph.D., Public Health, Walden University, 2015

M.P.H., Public Health, California College of Health Sciences, 2007

B.A., Psychology, University of Michigan, Dearborn, 1997

James B. Angell Scholar

Prior Experience

Social Science Research Assistant II, University of Michigan Transportation Research Institute (UMTRI), 1999-2001

Assistant Program Manager, HelpSource, 1997-1999

Professional Affiliations

American College of Epidemiology, Member, Professional Development Committee

American Public Health Association (APHA), Member

International Epidemiological Association, Member

Society for Epidemiologic Research, Member
