

Exponent[®]
Engineering & Scientific Consulting

Joshua Swann, Ph.D., P.E., CFEI

Senior Engineer | Thermal Sciences
17000 Science Drive, Suite 200 | Bowie, MD 20715
(301) 291-2561 tel | jswann@exponent.com

Professional Profile

Dr. Swann leverages his knowledge of fire protection engineering, fire dynamics, and heat transfer principles to analyze building fire protection and life safety systems, evaluate the fire performance of various materials and products, and conduct origin and cause determinations for residential, commercial, and industrial fire and explosion events. Dr. Swann's diverse training and practical experience includes the design and testing of active and passive fire protection systems and building life safety systems, conducting building and fire code assessments, and performing engineering hazard and risk analyses.

Dr. Swann provides expertise in building and fire code consultation for the installation, maintenance, and operation of active and passive fire protection and life safety systems for residential, commercial, and industrial occupancies. He has identified applicable codes and standards and subsequently evaluated the performance of automatic fire sprinkler systems, pre-engineered suppression systems, occupant egress systems, and automatic fire alarm and detection systems. His experience includes analyzing the fire performance of materials for various applications and the evaluation and inspection of buildings, facilities, and products for code compliance in accordance with codes published by the National Fire Protection Association (NFPA), the International Code Council (ICC), as well as requirements of state and local jurisdictions.

Dr. Swann has practical experience developing and performing fire experiments to evaluate the dynamics of pyrolysis, ignition properties, and fire performance of a plethora of materials under a wide range of failure conditions. He is familiar with small- and large-scale standardized fire tests conducted in accordance with standard tests methods such as those published by ASTM International (formerly American Society for Testing and Materials), American National Standards Institute (ANSI), NFPA, International Organization for Standardization (ISO), Underwriters Laboratories (UL), and the Code of Federal Regulations (CFR). Dr. Swann has designed, constructed, and carried out customized fire test procedures to evaluate complex scenarios. He also has practical experience utilizing milligram-scale thermal analysis techniques such as thermogravimetric analysis (TGA) and differential scanning calorimetry (DSC) as well as bench-scale tests such as oxygen consumption cone calorimetry. Dr. Swann has experience conducting fire tests on a wide range of materials and products including polymers, fabrics and textiles employed in personal protective equipment (PPE), insulation and building materials, household appliances, lithium ion batteries. He also has practical experience evaluating smoke alarms and high-pressure gas cartridges in various fire exposure scenarios.

Prior to joining Exponent, Dr. Swann conducted material flammability research at the University of Maryland in the Department of Fire Protection Engineering. Dr. Swann's graduate research included the development, construction, and operation of the Controlled Atmosphere Pyrolysis Apparatus II (CAPA II) to perform gasification experiments on highly charring and intumescent polymeric materials employed in applications ranging from medical devices to construction materials. He subsequently derived and validated comprehensive pyrolysis models based on milligram-scale (TGA, DSC, and Microscale

Combustion Calorimetry (MCC)) and gram-scale (CAPA II) thermal analysis and pyrolysis experimental data. This work was funded by the U.S. National Science Foundation.

Academic Credentials & Professional Honors

Ph.D., Mechanical Engineering, University of Maryland, 2019

M.S., Mechanical Engineering, University of Maryland, 2018

B.S., Fire Protection Engineering, University of Maryland, 2014

Awards

International Association for Fire Safety Science (IAFSS) and the International Forum of Fire Research Directors (FORUM) 2020 Triennial Best Thesis Award – Excellence in Research – for Ph.D. thesis titled “A Comprehensive Characterization of Pyrolysis and Combustion of Intumescent and Charring Polymers using Two-Dimensional Modeling: A Relationship between Thermal Transport and the Physical Structure of the Intumescent Char.” The IAFSS and FORUM recognizes the best research thesis at Ph.D. and Masters’ levels, in all the fields related to fire safety science and engineering.

International Association for Fire Safety Science (IAFSS) and the International Forum of Fire Research Directors (FORUM) 2017 Triennial Sheldon Tieszen Student Award to present a paper entitled “Controlled Atmosphere Pyrolysis Apparatus II (CAPA II): A New Tool for Analysis of Pyrolysis of Charring and Intumescent Polymers.” The IAFSS and FORUM recognizes excellence in an IAFSS symposium paper in fire safety science by a student.

Licenses and Certifications

Licensed Fire Protection Engineer, California, #2135

Certified Fire and Explosion Investigator (CFEI) in accordance with the National Association of Investigators National Certification Board, NAFI #24395-14001

Professional Affiliations

International Association of Arson Investigators – IAAI (member)

National Association of Fire Investigators – NAFI (member)

National Fire Protection Association – NFPA (member)

National Fire Sprinkler Association – NFSA (member)

Society of Fire Protection Engineers – SFPE (member)

Additional Education & Training

Fire Pumps/Controllers & Air Supply Equipment with SPP & General Air, 2 NICET Credits, September 15, 2020.

Planning Ahead - Fire Sprinkler System Accessories for Freeze Protection & Corrosion Monitoring, 1 NICET Credit, July 23, 2020.

Fundamentals of Water-Based Fire Protection Systems Classroom and Hands-On Training, Viking Group, Inc., 13.5 hour course, January 8-9, 2020.

Inspection, Testing, and Maintenance (ITM) of Water-Based Fire Protection System Classroom and Hands-On Training, National Fire Protection Association (NFPA), 21 hour course, October 8-10, 2019.

Advanced Fire, Arson & Explosion Investigation Training Program, National Association of Fire Investigators (NAFI), 28 hour course, July 15-18, 2019.

Asbestos Awareness Training, in accordance with OSHA 29 CFR 1910.1001, 29 CFR 1915.1001, and 29 CFR 1926.1101, June 11, 2019.
