

Exponent[®]
Engineering & Scientific Consulting

Blake M. Whitley, Ph.D.

Senior Associate | Materials & Corrosion Engineering
23445 North 19th Ave | Phoenix, AZ 85027
(256) 684-5631 tel | bwhitley@exponent.com

Professional Profile

Dr. Whitley's areas of technical expertise center around the physical and mechanical metallurgy of structural alloys. His experience includes heat treatment, thermomechanical process optimization, metallurgical failure analysis, fracture mechanics, corrosion, and advanced characterization techniques across a range of alloy systems. Dr. Whitley's work has supported the automotive, aerospace, oil and gas, locomotive, and metals production industries.

Prior to joining Exponent, Dr. Whitley worked as a Senior Metallurgical Engineer with ATI Specialty Materials. During that time, he served as Project Lead and Technical Lead on multiple next generation alloy development efforts for the jet engine market. His primary focus at ATI was powder-based nickel superalloy development, with supporting roles in titanium alloy development and high speed steel process optimization. Dr. Whitley oversaw projects from initial concept, through the Research & Development phase, and into full-scale manufacturing.

Dr. Whitley's academic work at the Colorado School of Mines investigated the effects of thermomechanical processing routes and heat treatments for optimizing the induction hardening response of automotive shafts using microalloyed steels. During this time, he operated and managed a Gleeble 3500 thermomechanical simulator laboratory, and collaborated on projects involving thermomechanical processing of carbon and stainless steels, aluminum, titanium, niobium, and nickel alloys. Dr. Whitley has presented his work at 6 international technical conferences, and has delivered 4 invited lectures. His technical writing has earned recognition as the Bodycote Best Paper in Heat Treating, and American Foundry Society's Best Paper Award.

Dr. Whitley is active within ASM and has served as a student member on the Board of Trustees of ASM International and the ASM Heat Treating Society. He has also served on ASM technical committees and as an ASM local chapter Executive Board Member.

Academic Credentials & Professional Honors

Ph.D., Metallurgical and Materials Engineering, Colorado School of Mines, 2017

B.S., Metallurgical Engineering, University of Alabama, 2012

Prior Experience

Senior Research & Development Engineer, ATI Specialty Materials, 2017-2018

Graduate Student Instructor, Colorado School of Mines, 2012-2017

Metallurgical Engineering Intern, ALSTOM Power, Summer 2011 & Summer 2012

Professional Affiliations

ASM International TMS

AIST
